# FORD'S NURSERY

Phone 55

MAGNOLIA, MISSISSIPPI

GROWERS OF THE FINEST, HIGH BRED, EARLY BEARING, GRAFTED  
PAPER SHELL PECAN TREES; AND BUDDED SATSUMA TREES

This picture was taken in our Nursery, looking down two rows of Grafted Paper Shell Pecan Trees, showing thrifty, vigorous, early bearing trees ready for digging and delivery as soon as December and January come.

Numbers of our customers who set out trees two years and nine months ago, report their trees bearing nuts and have ordered more.

## VARIETIES

STUART - SUCCESS - SCHLEY

### PRICES:

3 foot size	\$ .75	each
4 foot size	.85	each
5 foot size	1.00	each
6 foot size	1.15	each
7 foot size	1.25	each

**TERMS OF SALE OF TREES:** The cash is required when the trees are delivered. We buy everything for cash and sell the same way. In this manner we offer you the best trees that can be grown at a close price. No deposit required when you place order reserving trees.

**GUARANTEE:** We absolutely guarantee every tree we sell to be grafted from an unusually fine tree, of the variety specified, each tree to be thrifty, vigorous, and carefully dug out and packed. Any tree that dies will be replaced at half price.

All trees have been inspected by  
State Plant Board.

The time to set out Pecan trees is during  
December, January, and February.

The sooner they are set out, the better the ground will be settled about their roots when spring comes. We will not dig or deliver any trees until they become thoroughly dormant, and the ground soaked by rains. This insures their growing good. As soon as this occurs we will write and ask you when you want your trees dug, so that you will get them when it is convenient for you to set them out, and the trees will be freshly dug.

Set trees 60 feet apart each way,  
12 trees to the acre.

Full planting instruction on blue circular.

## COMMENTS

SCRUPULOUS CARE in every detail, is a creed here,  
and quality the law.

12 PECAN TREES, set out on one acre will cost about 15 dollars. At the age of 15 years that same acre is worth from one hundred dollars to eighteen hundred dollars. Depending on the growth, and the bearing qualities of the trees. Bearing ability is tied in with the graft.

I HOLD THAT when offering pecan trees for sale, that it is a responsibility that ranks second to none. The man who does this, is under a binding obligation to his purchaser, and his children to give them the best trees that can be produced. A man that offers pecan trees, and the best trees of each type in the country, is assisting his fellowman to a peace of mind that come from a prosperous state of his affairs.

PREPARE FOR the future now. Plant Pecan trees, and Satsumas. It will soon be here, whether you plant them or not. If you have passed the age of 25 years ten years from now is just around the corner, and if you plant pecan trees, that investment which is accumulative will stand out at the end of ten years beyond and above the sum of your other combined achievements.

THE PECAN AND SATSUMA industry is in its infancy. Start NOW and you are among the pioneers. This is the class that makes the money in any line of endeavor.

FINE SELECTED Paper Shell Pecans bring prosperity. I offer the best pecan trees possible.

IF YOU WISH the bounty of peace and plenty when you are older, plant our trees now.

# Genuine Delicious "Owari" Satsuma Orange Trees

Grown in Ford's Nursery, Magnolia, Mississippi

Scene in our Nursery showing vigorous growth of Satsuma Trees. Best growth you ever saw. Buds used were carefully selected from an exceptionally productive Satsuma grove. They are budded on strong citrus trifoliata stocks.

These trees should be set out during December, January, and February, at the same depth they grew in nursery rows.

Then pile (or bank) dirt around them with a round pointed shovel to a height of 18 inches, entirely covering leaves and body of trees to this height. Remove this dirt next spring, and all of the leaves and wood covered will be as green as when the dirt was placed around them. This is insurance against loss by an extreme spell of cold weather.

Three years after setting, trees will bear Satsuma Oranges. They are evergreen trees. **THEY SHOULD BE SET OUT 20 FEET APART EACH WAY—100 TO EACH ACRE.**

## Prices on Satsuma, Grapefruit and Kumquat

	each	100	1,000
3 years old 3 to 4 foot size	.75	.60	.50
2 years old 2 to 3 foot size	.50	.40	.35

Orders accepted from one tree to a thousand or more. Have thousands ready for sale.

Send in your order and your trees will be reserved for you.  
**NO DEPOSIT REQUIRED WHEN YOU PLACE YOUR ORDER.**

Set them on high, well drained land sloping to the South where possible. Just South of your house is a good place for a number of trees.

Profits on Satsumas are large. Returns are quick. Danger of cold can be offset by banking the young trees with dirt about eighteen inches high.

Don't be among those who five years from now will wish they had set out Satsuma Trees. Send in your order. Choice trees will be reserved for you.

## DON'T OVERLOOK ANY DIAMONDS

KIMBERLEY was going back. The farmers were disgruntled. They said they couldn't eke a living from the rocky soil.

**And all the time, their ragged youngsters were playing with diamonds!**

But the farmers didn't know. Many of them died poor. They thought the priceless gems were pebbles.

Some folks are just like those Kimberley farmers. They seek opportunity in some distant places and overlook the wealth that is at home within their grasp.

**Pecan and Satsuma planting is a diamond mine of opportunity.**

**The trees we offer you are the best that money, study, careful propagating and hard work can produce.**

Fortunes are being made in these two lines. why not you, whose soil and climate is so favorably suited to them? Do not be among those who ten years from now will wish they had. Start now, and harness Mother Nature and Father Time to do your work—they are the two most powerful forces known. Their results accumulate. Things don't happen in this world they are brought about.

**FORDS' NURSERY**  
 Magnolia. - Mississippi

Here is a picture showing that Satsuma trees are bearing oranges in our nursery this year. They are on well developed, big root stocks, and will grow off fine next year.

They are all free from disease and have been inspected and approved by the State Plant Board of Miss.

This SATSUMA NURSERY is 1½ miles Northwest of Magnolia. Come to see it.

Our Satsuma trees have made wonderful growth this year, being budded on vigorous well developed root system. They are exceptionally large in diameter for their height and well branched.

The Owari Satsuma which we offer is the variety most generally grown in Japan, where it has practically taken the place of other strains. The fruits of the Owari Satsuma are large, flat, depressed at both stem and blossom end, deep orange in color, with thin skin, which is smooth, and this may be peeled from the pulp with the fingers without breaking the sections, with which the fruit is divided, and are practically free from seed. There is nothing you can think of surpasses a full grown, well ripened Owari Satsuma Orange. Trees of this strain are thornless, vigorous, and prolific.

Owari Satsuma is an extremely hardy tree, having grown through ten degrees fahrenheit without injury, and it's natural hardiness is increased by budding on Citrus trifoliata stock. This is the only stock to bud Satsuma on, as it leaves barely enough sap above the ground during the winter to keep the leaves green. Young trees are heavy bearers, and under proper conditions an orchard of this variety brings early returns, on the investment. It is adapted to the southern parts of Georgia, Mississippi, Alabama, Louisiana and the gulf coast country of Texas. In this section Owari Satsuma is high class, delicious, profitable, prolific, orchard fruit.
